SPEND LIFT FROM DISCOUNTS

1 · Customer Pyramid — how value is distributed

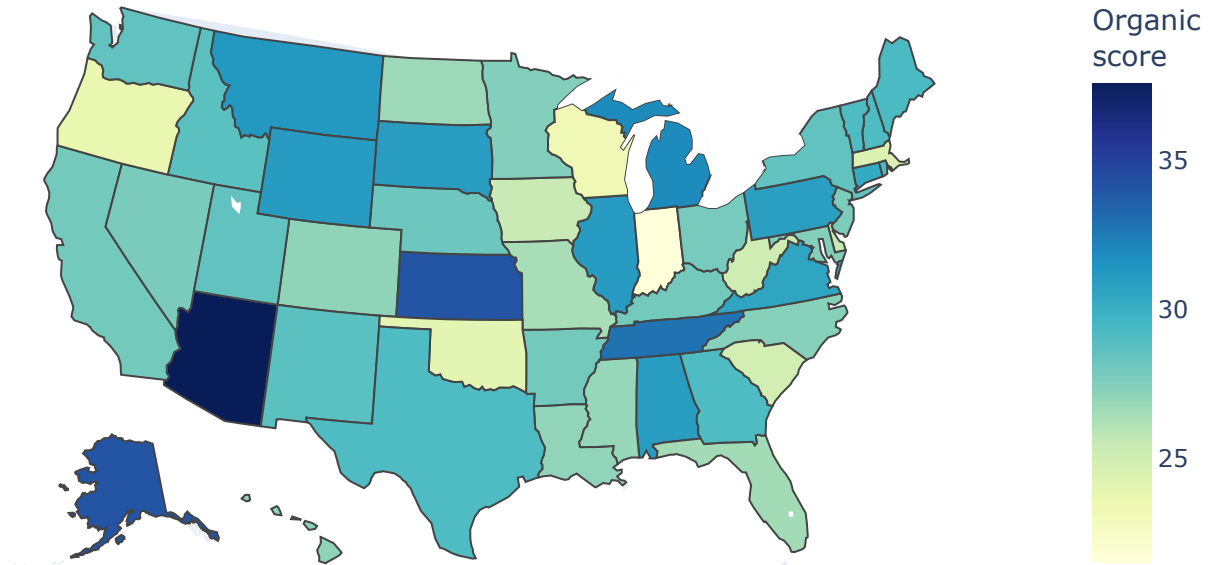

2 · Promo Dependency vs Retention — who needs discounts to buy

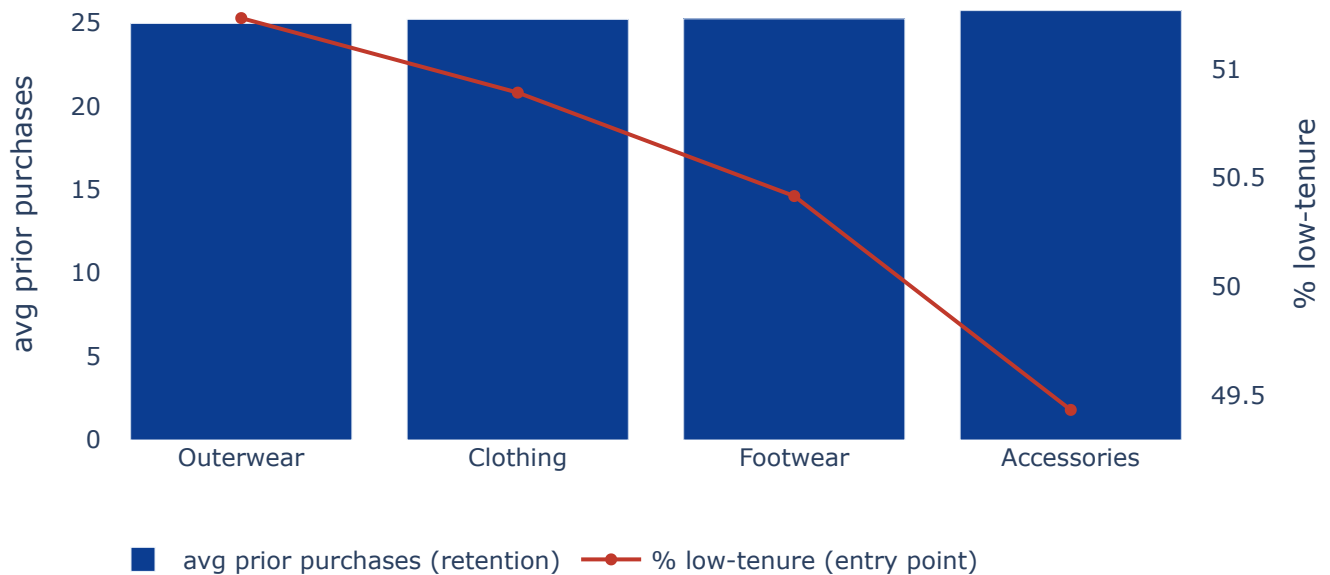

3 · Geographic Opportunity — organic demand (high value, low promo)

4 · Category Funnel — entry-point vs retention categories

Read: the loyal tip of the pyramid is thin (~7%); discounts don't move customers up-and-right in Panel 2; Arizona/Kansas/Alaska/Tennessee/Michigan glow in Panel 3 (organic demand); Clothing & Accessories are entry points in Panel 4. Hover any chart for detail.
